

NATURE ICE ORNAMENT!

Supplies: leaves, flowers, pinecones, anything from you want to put into your ice ornament, string, ribbon, or twine, scissors, muffin tin or something to freeze your ornament in (plastic containers, paper plate, cake pans etc), water!!!

- Collect some nature items to add to your ornament!
- Place nature cuttings into muffin tins however you like!
- Fill each muffin tin with water! It's okay if some of your cuttings stick out!
- Cut piece of string and place each end into water making sure the ends are fully covered by water! I tried to place mine so that each end was in the middle!
- Set outside (if cold enough), or place in freezer until frozen! Hang your ornament outside!
