Dramatic Play Activity: Make Your Own Toy Stethoscope

Supplies

- Headband
- Ribbon
- Felt Circle
- Liquid Glue

Once you have completed the craft you can use the toy stethoscope for a variety of doctor scenarios. Just carefully place the ends of the headband on the ears, or around the neck, and voila!

1. Loop the ribbon around the middle of the headband and glue in place. You can fold the ribbon over the glue to make it more secure.
2. Glue the felt circle to the end of the ribbon that is not wrapped around the headband.
3. If you want to decorate the felt circle you can use any fabric paint or fabric markers. These have not been included.
