

Toy Story Slinky Dog Craft For Kids

 seasonalmemories.com/toy-story-slinky-craft-for-kids/

May 23, 2019

Depending on your little one's age, you may want to help them by cutting out all of the pieces of paper in advance, but they will all have a blast folding the strips of paper and creating their very own dog craft.

While this craft may look intimidating at first, it was actually super simple! And to make it even simpler on everyone involved, your younger kids can easily help put this Slinky dog craft together after you have cut out the pieces for them.

All you need for this craft is a brown paper bag and a few small pieces of paper- things you probably already have on hand! If not, feel free to get creative and color different pieces of cardstock, cardboard, or any other paper you have around the house. We have used cereal boxes on many occasions, and the crafts we make usually hold up longer too!

Supplies:

- Brown Paper/Paper bag.
- Dark Brown Paper.
- White Paper.
- Black Paper.
- Paper Glue.
- Scissors.
- Black Marker

Directions:

Step 1: Use the template to cut out the body pieces for the slinky dog.

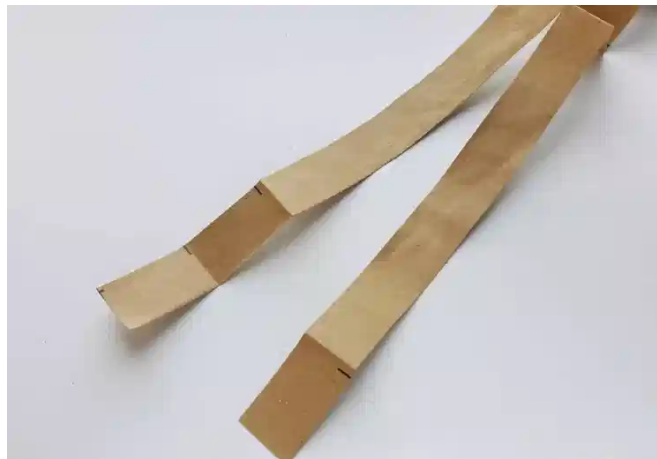

Step 2: First glue the black circular pieces to the white circular pieces for the eyes. Then glue the ears on the head. Glue the black piece on the bottom of the cream triangular piece as the nose for the dog. Then glue the tails pieces together.

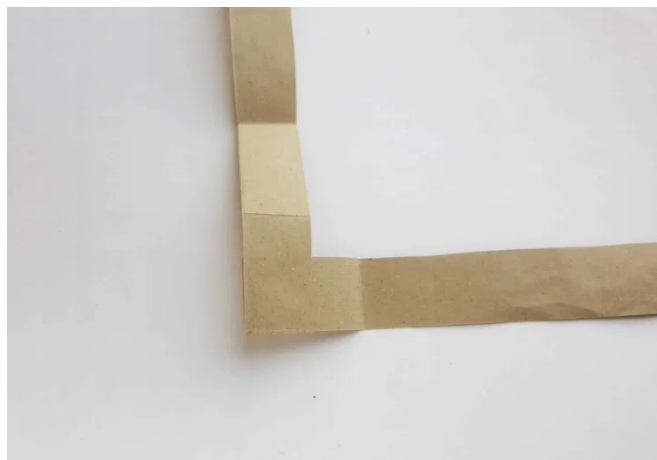

Step 3: Now glue the mouth and the eyes on the head, Then glue the tail to the bottom.

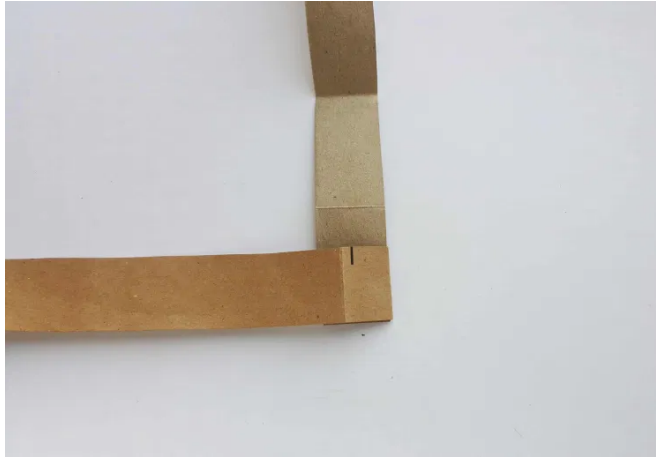

Step 4: Now take 2 strips of brown paper. The length should be about 24 inches or more and the width should be around 1 inch.

Step 5: Place one strip horizontally and the other one vertically. Then glue one of the ends of the both strips together by giving it an “L” shape,

Step 6: Now bring the bottom strip (the horizontal one) all the way over the upper one to the right side.

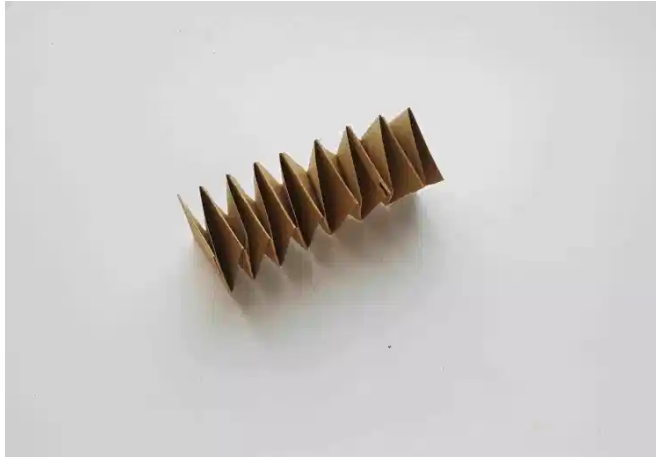

Step 7: Similarly bring the vertical one all the way over the horizontal one and downwards.

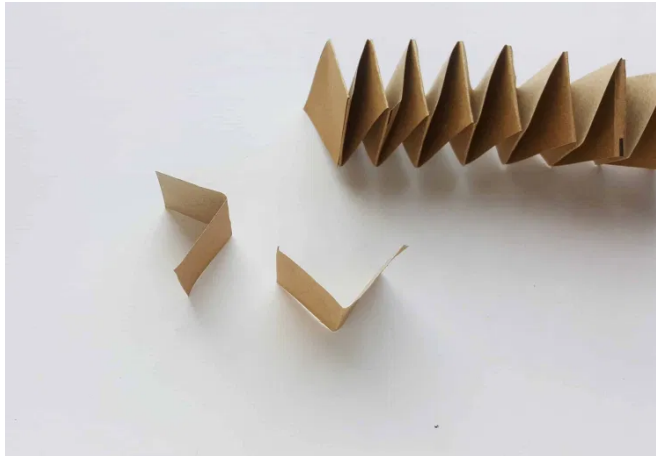

Step 8: Keep doing this process until you reach the end of the strips.

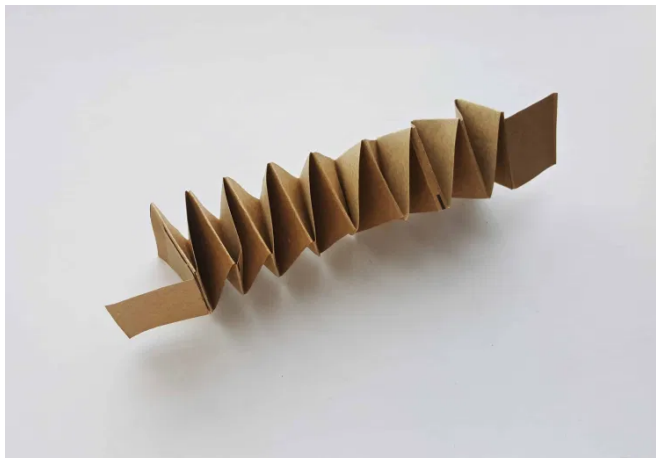

Step 9: Glue the end of the strips to secure the folds. This is how the spring should look like.

Step 10: Now take 2 pieces of the brown paper with same width and about 2 inches then fold them in half.

Step 11: Glue one of the pieces on front of the spring and the other one the bottom of the spring.

Step 12: Then glue the head of the dog on the front one and the dogs bottom on the end of the spring. And here you go! The Slinky Dog is READY!
