DIY Unicorn Bookmark
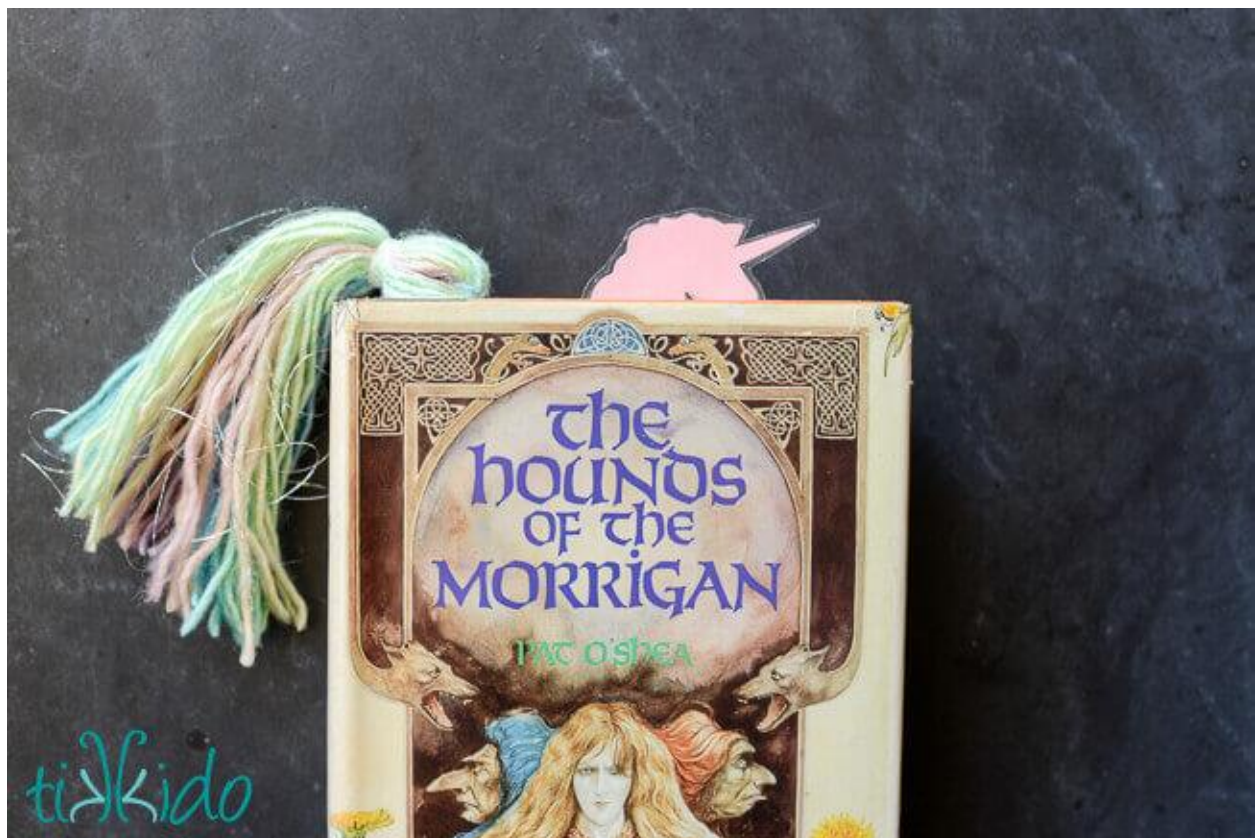

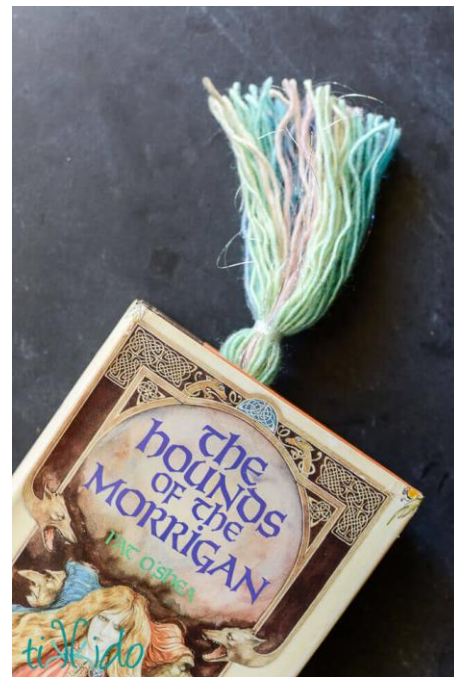

Instructions found here: https://tikkido.com/blog/unicorn-bookmark-favor-tutorial

Your kit contains a paper unicorn and a small ball of yarn. If you want your bookmark to be sturdier, you may want to either laminate it or cover it with clear shipping tape.

Instructions for making the unicorn tail:

1. Wind the yarn around a small book or box that is approximately the length you want your tassel to be. Cut these strands in half.

2. Tie a piece of yarn around the center of the gathered strands of yarn, fold in half, and tie more yarn just below the center point to create the tassel shape. Trim ends so that they are even.

3. Tie your completed yarn tassel tail to the pre-cut hole in the paper unicorn.
