

DECOUPAGE PHOTO CUBE

Supplies:

- Wooden photo cube
- White paint (small paint pots)
- Mod Podge (large condiment container)
- Foam Brush
- Pictures from your home computer or the library's public computers

Instructions:

1. Paint two coats of white paint letting it dry in between each coat. (The example shows cream colored paint and you may choose to use any color that you like depending on your personal taste.)
2. Using the foam brush, apply Mod Podge to the back side of one of your printed pictures and then place on the wooden block.
3. Apply a layer of Mod Podge over the picture sealing that whole side of the wooden block.
4. Repeat steps two and three for each side of the block and let dry.
5. Apply two additional layers of Mod Podge to each side of the block letting it dry in between each layer.
