

LET'S CREATE A MACRAMÉ ROCK NECKLACE

Supplies: rock, string or yarn, paint, paintbrush, tape, beads (optional)

- Paint your rock however you like.
- Cut your string into 8 equal lengths (whatever length you want your necklace to be and a little extra).
- Tie the 8 pieces of string together in a tight knot. Leave a tail for the tassel.
- Tape the tail down to a flat surface in order to make your knot tying easier.
- Pair the strings off into sets and tie each set together (the distance of your knots will be determined by the size of your rock).
- Now pair each string with the piece to the side and tie the next level of knots and continue tying in the pattern until it is the desired size.
- Place your rock into the little basket you made and tie off at the top of the rock.
- Tie the top of your string to the desired length of your necklace.
- Add beads if desired.
