

Be an ethical bug catcher!

In this kit you will find a bug jar and stickers to decorate the jar with. You will also find a magnifying glass.

Catching bugs is a good activity that can allow children to explore the natural environment in a fun and exciting way. While we sometimes like to keep the bugs, it really isn't the best for them. Bugs are an important part of our world! After we have caught and examined the bugs, we should let them back out into nature. Please be an ethical bug catcher!
